

Aman Pathak

Senior Frontend Developer

amanpathak.devwork@gmail.com | (+91) 7984452648 | LinkedIn: [pathakaman7](#)

Skills

Libraries and Frameworks: React JS ([React.js](#)), Typescript, React Native (Expo), Redux, React Flow, Bootstrap, NodeJS, ExpressJS, Angular

Languages: Javascript (ES6+), Python, SQL, HTML, CSS, SCSS

Tools: Apache Airflow, Docker, Git, Github, JIRA, LM Studio, Ollama, Cursor, ESLint, Prettier

Others: Agile and Kanban Methodologies, Responsive Web Designing, REST, Prompt Engineering

Work Experience

LogicalWings | Vadodara (Remote) | Jan 2021 - Present

Sr. Frontend Developer

- Mentored and guided AI engineering interns on software architecture and engineering best practices to successfully build and integrate production-ready AI Chatbots and Voice Agents.
- Successfully implemented an Agile framework across the team, introducing Jira for optimized task distribution, robust project management, and transparent team velocity tracking.
- Engineered a Proof of Concept (POC) utilizing Apache Airflow, establishing core foundational architectures for Directed Acyclic Graphs (DAGs) and complex workflow task automation.

Frontend Developer

- Scaled and optimized a comprehensive digital healthcare and pharmacy savings platform (LevrX), driving development across two React web applications (Member and Admin portals) and a React Native Expo mobile application.
- Audited and overhauled frontend applications to drastically elevate core performance metrics, successfully reducing Largest Contentful Paint (LCP), First Contentful Paint (FCP), and Cumulative Layout Shift (CLS).
- Actively led rigorous code reviews and engineering initiatives that successfully elevated application scores to 90% for Accessibility and 90% for Development Best Practices.

Shukul Infotech Pvt. Ltd. | Surat | Aug 2020 - Dec 2020

Software Developer

- Accelerated development timelines by 20% through the creation of compliant, accessible web components while simultaneously designing modular Node.js API routes and MongoDB schemas to ensure scalable backend solutions as a full-stack developer.

WebOsmotic | Surat | May 2018 - Jul 2020

Jr. Software Developer

- Developed and maintained multiple software applications for a smart parcel locker system, successfully implementing secure, password-authenticated door-automation logic.
- Contributed to a scalable network infrastructure that optimized logistics, resulting in a 46% cost savings on reverse retail logistics, a 77% reduction in courier redelivery costs, and saving property managers an average of 10 hours (25%) per week in delivery processing time.

RedSoft Solutions Pvt. Ltd. | Surat | Feb 2017 - Apr 2018

Software Developer

- Engineered a robust, scalable web application using AngularJS, enabling users to seamlessly create and customize complex, dynamic forms from scratch.

Personal Projects

SysGenie - AI-Driven Architecture Modeling Tool |

Tech Stack: *React, React Flow, NodeJS, Express JS, LM Studio (Gemma 4 Local LLM)*

- Engineered a backend middleware that utilizes a localized LLM (Gemma 4) via LM Studio APIs to analyze user prompts, acting as an evaluation agent to validate and route system design requests and response to frontend in a structured nodes and edges JSON format.
- Frontend renders an architectural system design from the response by designing a graph via React Flow

Awards and Certifications

- Employee of the year - 2025
- Agile Scrum Master Completion Certification - Simplilearn - 2024
- Team of the year - 2023
- Technocrat of the year - 2021

Education

- **Master of Computer Applications** | Savitribai Phule Pune University | Pune | 2016
- **Bachelor of Computer Applications** | Veer Narmad South Gujarat University| Surat | 2014
